

Matise is looking for a great, (slightly) stubborn, passionate Experienced Front End Developer to join our team. As an Experienced Front End Developer at Matise you're involved in the complete development process, from idea to execution. You think, steer, execute, can give and collect feedback and you can completely lose yourself in that animation that can be just a little bit smoother.

Together with our team of Designers, Project Managers and Developers you will create innovative platforms, branded eCommerce experiences (based on Shopware 6) and high-scoring digital campaigns for our clients.

You:

- Over the past five years you've enjoyed working as a Front End Developer at an agency.
 - Enjoy beautiful things.
 - Can communicate with designers.
 - Are looking forward to be a mentor for our Front End team.
 - Own HTML5, SCSS and JavaScript
 - Breathe Front End, but can paint a clear picture of what's going on with Back End.
 - Experience no problems when you communicate with clients.
 - Empty the dishwasher when you see that it is full.
 - Say "Hello" to the cleaner.
-
- Have some or a lot of experience with: Vue, Nuxt, Node, WebGL, PHP, GIT, Gulp, Webpack, Flexbox, CSS Grid, React, Node, Canvas, Webpack or WCAG2.0.

Matise is pure, proud, entrepreneurial and distinctive. We:

- Grow healthy as an organization, look at elephants from our office in the heart of Amsterdam every day and have one simple goal: :D
- Don't give our clients what they ask for, but what they need.
- Craft everything in-house. From concept to product.
- Do not make proposals that we cannot deliver.
- Let you know if your work is completely the shit, we will do also if it isn't.
- Even win design awards with never ending projects.
- Pitch ideas together regularly.
- Sold World Peace in a box for Amnesty International, designed for the largest bicycle brands in Europe and are one of the first Shopware 6 partners in the Netherlands.
- Do not measure success by the number of hours you work or how much you are in the office. Excellent performance despite minimal effort is rewarded with more responsibility and pay.

- Take good care of you. You start with a 6 month contract with an option to convert it to an indefinite period. You receive an excellent salary, pension plan, an NS Business card or travel allowance and 5+ holiday weeks per year.

Did you check 80% of these bullets? We would like to hear from you. Send your CV / website / GitHub account and add a short message explaining why you fit in with us to office@matise.nl. Please add which of your work you are most proud of, and what your focus would be in your first month with us.
